EXPERIENCE

Data Scientist

The Depository Trust & Clearing Corporation

Apr 2018 – present Tampa, FL

Application Development Machine learning Specialist

- Designed and prototyped an ML deployment method allowing solutions to be deployed at scale and regulatorily compliant in production.
- Integrated an enterprise data science platform capable of supporting thousands of users on Jupyter, H2o Flow, and R Studio.
- Prototyped and developed ML solutions using clustering methods, outlier detection, natural language processing, and classification methods for 3 different clients.
- Developed core ETL processes for a new revenue-generating data product and used it to deliver validation data for third party analysis and evaluation.

Data Scientist

Nielsen Media Research

Feb. 2017 – Apr 2018 Oldsmar, FL

Local Television Custom Analytics and Client Inquiries

- Engineered, integrated, and validated big data sources scaling local television reporting tools from hundreds to millions of data points.
- Built custom machine learning regression models for client solutions as a part of multimillion dollar client support contracts.
- Built video classification model for internal engineering leading to production implementation solution as well as a patent application.
- Modernized a critical customer reporting tool (bash/SAS -> Spark/Python) used to generate reports for hundreds of client stations annually.
- Developed new custom reporting tool for client reports on genre categorization alleviating concerns on the part of clients.

Graduate Teaching Assistant

Kansas State University

Jun 2016 – Jan 2017 Manhattan, KS

- Recitation instructor for Calculus 1 and tutoring for College Algebra, Calculus 1, 2, and 3, Business Calculus, and Linear Algebra influencing over 100 students.

Graduate Teaching Assistant

Missouri State University

Aug 2014 – May 2016 Springfield, MO

- Lecture instructor (5 sections) & recitation instructor (2 sections) college algebra guiding over 200 students to success. Lead algebra test development for 2 semesters used for over 1000 algebra students.

Freelance Python Developer

Upwork

May 2014 – Aug 2014 Springfield, MO

- Built data pipeline tooling and trained in deep learning methodology with Ersatz Labs during a critical additional funding round and public release.

TECHNOLOGIES

Python
SQL
Spark
Bash

AWS Linux Git Scala C++
Agile Jenkins Markdown R

EDUCATION

M.S. Mathematics

Missouri State University

May 2016 3.92 GPA

B.S. Applied Mathematics

Missouri State University

May 2014 3.75 GPA

RELEVANT COURSEWORK

Data Structures & Algorithms

Convex Optimization

Numerical Analysis

Applied Abstract Algebra

Statistical Theory & Methods
